

Xchanger

SaaS-based

High STP Rate: 99%+

Native ISO 15022, ISO 20022

No-code solution to effortlessly transforms and routes diverse business data, including formats like XML, TEXT, CSV, and Swift, across various media such as files, queues, emails, and web services.

It streamlines message schemes for easy integration within any ecosystem. The platform enables identification, mapping, and enrichment of incoming data across channels and protocols, and allows configuration-based routing and control of outgoing flows. It also features a dashboard for monitoring data flows, managing exceptions, and maintaining an audit trail.

Unified Data Management

Centralise and harmonise all data flows with a single solution.

Configurable Efficiency

Save costs and optimize processes with easy configurations, no coding needed.

Performance & Compliance Boost

Enhance productivity, quality, and compliance standards.

Multichannel Communication

Easily engage customers across various channels for effective communication.

Seamless Data Integration

Integrate disparate systems' data into your existing architecture.

DevOps-Ready

Stay agile and responsive to change with DevOps compliance.

Dynamic Routing & Integration

Leverage high routing capabilities with diverse integration patterns.

Data Enrichment & Mapping

Configure data enrichment and mapping for efficient processing.

Prioritisation & Handling

Manage priorities, confirmations, and cancellation seamlessly.

Centralised Monitoring

Ensure data control, track exceptions, and audit with a monitoring dashboard.
